SUMMARY

Software Engineer with hands-on experience designing and building scalable, distributed systems and AI-powered applications. Proficient in C++, Python, and Dart, with a strong track record of developing fault-tolerant back-end services and cross-platform mobile solutions. Adept at working in teams to deliver end-to-end products, with a customer-focused mindset and a passion for driving quality, reliability, and innovation.

SKILLS

Proficient: C++, Python, Dart, HTML, CSS, JavaScript

Familiar: Flutter, Django, Flask, FastAPI, Docker, Git, Linux, Postman, React.js

CS Concepts: Data Structures & Algorithms, OOD, Complexity Analysis

Databases: SQL, MongoDB, RESTful API Design

EDUCATION

Indian Institute of Information Technology, Vadodara

Aug 2024 – Present

M.Tech in Computer Science and Engineering (Artificial Intelligence)

CGPA: 8.52 / 10.00(Pursuing)

Gujarat Technological University, Gandhinagar

Aug 2020 – Apr 2024

Bachelor of Engineering in Information Technology

CGPA: 8.52 / 10.00

EXPERIENCE

Flutter Developer Intern

Accrete Info Solution Technologies LLP, Gandhinagar — 2024

Architected and optimized cross-platform mobile apps in Flutter/Dart reduced startup latency by 25%. Managed state efficiently using optimized widget trees for smooth 60 fps rendering.

Python-Django Intern

Creart Solutions, Ahmedabad — 2023

Designed RESTful services in Django/PostgreSQL. Implemented business logic, database migrations pipelines for rapid feature delivery.

PROJECTS

Safe Ship Navigator (React, Flask, AI)

Enhanced maritime routing with AI-driven predictive path planning integrated bathymetry and wind APIs. Deployed a fault-tolerant microservice architecture with Docker and Nginx load balancing.

Multi-Modal Data Collection App (Flutter, Python)

Built a Flutter mobile app to capture and upload facial images, 30-second ambient audio clips, and user-provided labels for ML dataset creation. Integrated with a Python backend API to securely store and organize collected data for model training.

Order-Taking App (Flutter, FastAPI)

Developed a Flutter app enabling users to record customer orders directly in-app. Implemented features to add and manage customers, categories, and products through the app interface. Created a FastAPI backend to persist orders, customer profiles, categories, and product data in real time.

ACHIEVEMENTS

1st Prize – IIITVCC “Contribute-a-thon” Open-Source Event (2024)

Gold Badges in Python and SQL
